  6. Turn on Vigilant mode
- 

## Gitea

1. Settings
2. SSH / GPG Keys
3. Add Key
4. Paste in the public key block
5. Add Key
6. Verify

## Screenshot:

A terminal window with a dark background and light blue text. The prompt is 'echo'. The command 'gpg -a --default-key [redacted] --detach-sig [redacted]' is entered. The output shows 'gpg: using [redacted] as default secret key for signing' followed by '-----BEGIN PGP SIGNATURE-----'. Below this is a large redacted area. At the bottom, it shows '-----END PGP SIGNATURE-----'.
